At key stage 1, the key knowledge progression document takes full account of the national curriculum's requirements and groups these into the following strands:	<ul> <li>KKPDs match the ambition of the National Curriculum. In some instances, knowledge specified within the KKPDs is more ambitious than the National Curriculum. For example:</li> <li>Pupils in Year 6 learn about the credibility of website content and hot to use filters within digital content (C6.9 and C6.10). This is not specified within the National Curriculum.</li> <li>From KS1 onwards, pupils are taught about copyright issues. Again, this is not specified in the National Curriculum.</li> <li>National Curriculum Aims: <ul> <li>can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation</li> <li>can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems</li> <li>can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems</li> <li>are responsible, competent, confident and creative users of information and communication technology.</li> </ul> </li> </ul>
--	---

• When considering pupils' improvement in subject specific vocabulary, pupils could be provided with a knowledge organiser which contains the relevant words used for computing for their age group.

Strand	Algorithms	Reasor	ning	Creat	ting Programs	Using Technology	Uses of IT Beyon	d School	Online	Safety and		Copyright
